Brooklyn Standard-Union. 1 Dr. Lyman Beecher was once asked what he did for revenue while he was going through Yale College, and said in reply: "Staples, the butler, left college six weeks before the end of the year, and I took the buttery and bought out his stock for about \$300, which I borrowed. I went into it hot and heavy. One day I bought a lot of watermelons and One day I bought a lot of watermelous and cantaloups and trundled them across the green on a wheelbarrow, in the face of the whole college. I sent to New York by an English parson (a judge of the article) and bought a hogshead of porter and retailed it to the students." That buttery was a regular thing in those days, but has wholly disappeared since. The old law of the college, written in Latin, and bearing upon this subject is as follows:

"The butter may sell in buttery, cider, metheglin, strong beer (not more than 12 barrels a year), loaf sugar, pipes, tobacco, and

The McClellan mansion was the scene of bustle and excitement when this letter was found. The daughter immediately broke the contents to her father, who started for the police station. He arrived there breathless and hatless about 11 o'clock, with the startling information that his wife had committed suicide. A searching party was immediately made up, which scoured the town and patrolled the lake front for miles, with-out any trace of the unfortunate lady.

About midnight, when the search was at its height, the front door of the McClellan house was cautiously opened and Mrs. Mc Clellan entered. She fell into her daughter's arms, and finally recovered sufficiently to explain that she went away with a firm determination of committing snieide, but was deterred by the thought of her daughter and grandchildren. Mrs. McClellan is quite wealthy, refined appearing, and about 45 years of age. None of the members of the family would talk about the matter, but it is known in the neighborhood that Dr. Mc-Clellan and his wife do not live happily

A TRUE PHILANTHROPIST. Instead of Giving Money to Beggars He Provided Work for the Poor.

London Letter in Providence Journal .] A man who died here this week-Colonel Tomline-is worth your readers' attention for a moment. He was a grandson of Bishop Tomline, who wrote the life of Pitt. He had a lot of money and a conscientious feeling of responsibility as to the use he should make of it. He used to receive heartrending appeals from people who wanted money. These made his life a trouble to him. It brought him too much into touch with the misery of the world and simply added to his perplexity. How could he distinguish between the genuine cases and the impos-tures? How could he wisely distribute the charity he was willing to dispense? He gave up the attempt. He burnt the begging letters (as far as he could distinguish them) without opening them; and devoted the whole of his spare money to enterprises that would employ labor, in that way diminish the poverty around him.

He was a cotemporary of Gladstone's at Eaton; it did not at all seem certain at that time he was not going to turn out the cleverer man of the two. Sir Robert Peel bracketed him with Gladstone as one of his clever young men. Some disappointment-possibly a love affair-is said to have poiled him and deprived him of ambition. He was also associated with the other leading political figures of this generation of Englishmen.

But what you have just been saying prompts me to tell you something under cover. There isn't one depositor in 200 who will allow his wife to check against his money. Occasionally a man leaving town will come in and ask us to honor his wife's checks to a certain amount. A woman doesn't seem to have any sense about money in bank, unless she is her own depositor, and then she is apt to be a good deal of a nuisance. She will come down shopping for instance. She buys a bill at one house for \$13 89, and she gives a check for that sum. She makes purchases at another house to the amount of \$3 39 and gives a check for that. And she goes on shopping a half day, giving a check for every purchase. A most remarkable thing is presented in this table. That is, the success attained here in the American idea of a Democratic Government. We have here a "representative" Legislature to an extent little suppected. Many of the professions are represented, and, in the class dubbed "business men," the writer has included almost as many different kinds of business as there are individuals, and all ranks from the laborer to the millionaire. The professional politician has been placed in that class to which his business education or interest belongs. Probably no industry of the State of any importance—coal, iron, lumber, tanning, petroleum, commerce, merchandizing, educational and professional interests—fails to be represented at Harrisburg. Whatever may be said of the "aristocratic privilege" tendency of Washington councils, such a condition of things is not yet true of the Legislature of this Commonwealth.

David Dudley Field is quoted as saying there are 70,000 lawyers in this country, and they are to a great extent responsible for the gross wrongs committed in the name of the law, because they make the laws and then abuse them with technicalities, Field's numerical fact may be true; but the legal representation in our Legislature hardly justifies his deductions.

AS TO THE FOREIGNER. An eminent divine with lachrymal glands suffered with sodium-chloride, and with the voice of Jeremiah, the ancient "kicker."

suffered with sedium-chloride, and with the voice of Jeremish, the ancient "kicker," has been recently calling for a time when no foreign-born shall be elected to our legislative or executive halls. Alarmists of this sort seem to have no knowledge of such men as General Sheridan, A. T. Stewart, Dr. William M. Taylor, or President McCosh, of Princeton, who was imported by our most conservative college to educate American youth. Hearing these plaints, one might suppose the United States were about to be dismembered and annexed to Hungary, Italy, Ireland and China.

Let us examine the table to see if such a condition of things is true of the Harrisburg body. Of the 254 members, 38 were not born in our own Commonwealth; and of these 38 only 18 were born outside the United States, and of these 18 the writer is under the impression that everyone came to this country in early youth and received here his education and grew into American citizenship. Twenty of the 38 were born in neighboring States. Of the 18 foreign-born, there are 3 English, 3 German, 9 Irish, 2 Welsh and 1 Canadian. And only one of them is in the Senate, the others being in the House. It would seem that here is no cause for alarm; merely a foreign quality sufficient to retain the European elements that were the origin of our great nation.

OTHER INSTRUCTIVE POINTS.

OTHER INSTRUCTIVE POINTS. OTHER INSTRUCTIVE POINTS.

It is interesting to note that so many of the men who saved the nation during the war are still serving us in a public way. Over 27 per cent are soldiers. Corporal Tanner may still be sure of the country's safety. Outside of the law, professional men have few representatives. Physicians, ministers and teachers are few in number, although a fifth have some time in life used teaching as a stepping stone to some other pursuit.

Considering the immense influence of the Considering the immense influence of the modern newspaper, it is somewhat note-worthy that so few journalists go to Harrisburg. The one clergyman in our list was an army chaplain; he finally abandoned his pro ession and was elected as a farmer. The clergy and the teachers are doing a more important work in their spheres of usefulness at home.

at home.

To the international celebration of 1892 the Harrisburg Legislature presents a healthy political growth. The foreigner is not invading our American polity; the too numerous lawyer is not despoiling the dignity of the State for personal gain, our laws are not enacted by a body of political sharks who are indifferent to the interests they pretend to represent.

PITTSTON, September 20 .- The Keyston Colliery, near Fablin, was not reached by a railroad until a short time ago, when the Erie road built a branch road to the colliery and secured a monopoly of all the coal tonnage of the hillside and several other nearby breakers. A few months ago the Jersey Central resolved to make an extension into the same territory. The Erie fought the Jersey Central project in the courts, and was beaten.

To-day the Erie folks stationed a number of watchmen along their road, and issued orders for the erection of shanties to shelter them. The watchmen will be kept on duty all winter, with instructions to keep the Jersey Central away at all hazards. As the olan of the latter embraced a crossing of the Erie branch, there may be trouble when the crossing is attempted

Shook, the well-known politician and man-

story of the affray as given by an eye-wit-

About 5:30 o'clock on the evening men-

barroom of the Morton House, facing Broad-

Thomas Patten entered and approached the

entrance, as subsequent events showed. Mr.

Shook succeeded in putting his antagonist

on his back near the cigar stand, Patten's

head narrowly escaping the sharp corner of the stand in falling. There was then a short struggle on the floor, Patten having hold of

the evening Mr. Shook reappeared for

awhile in the barroom, seemingly none the

worse for the encounter, excepting that his
